

## Molybdenum Powder

Appearance: Pure grey metal powder.

Applications: Widely used as raw material of molybdenum products and its alloy

### High Purity Molybdenum Powder

Code	Mo (%)	Specification	Applications
FMo-1	≥99.95	Fsss1-5	Apply for raw materials of moly products, moly silicate electric heating elements, alloy agent, some chemical reagents etc.

### Moly Powder

Code	Mo (%)	Specification	Applications
FMo-2	≥99.93	Fsss1-5	Apply for raw materials of moly products, moly silicate electric heating elements, alloy agent, some chemical reagents etc.

### TZM Moly Powder

Code	Specification	Applications
FTZM	Fsss1-5	Apply for TZM moly alloy material

### Spray Moly Powder

Code	Specification	(g/cm <sup>3</sup> )	Mo (%)	Applications
FMoP	-250+500目 -180+325目	1.6~3.5 3.5~5.0	≥99.9	Apply for surface coating of parts in machinery manufacturing industry like auto gear surface, piston ring surface etc.

Note: Above specification (model) and performance can be customer specified.
