SNOW PLOW INSERTS:

So many carbide insert options are available to suit the many different applications and requirements. ZGCC always take the customers' requirement into consideration and provide them the most suitable product to satisfy them. The grade YG10 is the most commonly used, many inserts are made

The following are drawings for our products and relevant size.

Item	Type	Single Weight	Length	Width	Height
1	NC-13501	60g/pcs	0.793	0.365	1
2	NC-12501S	62.37g/pcs	0.809	0.375	0.99
3	NF-12501CX	53.71g/pcs	0.750	0.360	1
4	NF-13503CL	44.5g/pcs	1.1	0.475	0.385
5	NC-12502X	49g/pcs	0.635	0.365	0.99
6	NC-08504Y	6.08g/pcs	0.635	0.365	0.125
7	NC-97501	48g/pcs	0.635	0.365	1
8	NC-12502LX	53g/pcs	0.635	0.365	1.125

SNOWPLOW

Parts are placed into milled grooves along the bottom wear surface of the edge giving it unmatched wear resistant properties and making this blade an ideal role of the speed highway or airport runway plowing.

Generally, the snow plow inserts are welded into the carbon steel blades. Different sizes blades which are replaceable are connected with the bucket, as shown on below picture:
